### Question 6.

Sam throws a dice 9 times.

Her father gives her £1 if the median score is more than 3.

The dice scores are

6 1 2 6 4 1 5 3 6

Does Sam win the £1?

1 1 2 3 4 5 6 6 6

Explain your answer.

MEDIAN

PI

Write numbers in order from smallest to largest.

Median is the middle number, which is 4.

This is larger than 3, therefore Sam's father will give her £1.
